Edmonton is a thoroughly modern city, with metropolitan conveniences, and is considerably "bigger than its size."

Edmonton was the first city in Canada to own and operate a Municipal Telephone System, Electric Light and Power Plant, and Street Railway.

Edmonton was the first city in Canada to adopt the Single Tax Assessment on land values only, improvements carried, whether buildings, plant or merchandise, being exempt.

Edmonton was the first city in Western Canada, and the second in the Dominion, to instal a modern Automatic Telephone system.

Edmonton's aggregate volume of business, as indicated by Bank Clearings, Custom House returns, etc., is growing faster than that of any other city in Canada—possibly on the continent.

Edmonton is a great transportation centre; 10 passenger trains arrive each day and as many depart.

Edmonton is the centre of the greatest coal area on the American continent.
